

**AMENDMENTS TO THE SPECIFICATION:**

On page 8, before line 1, please insert:

Next, the process is given time for clean interfacial separation (step 220). Once step 220 is complete, a quality saleable product phase is obtained (step 222), a solid phase is obtained (step 224) and an aqueous phase is obtained (step 226).

On page 8, before line 16, please insert:

Although the ratios and/or blends of the above listed chemicals can vary depending on a particular application, one illustrative non-limiting exemplary composition of HSC2003 includes Hydrotreated Distillate in the range of 45%-50% and Terpene Hydrocarbons in the range of 45%-50%, as noted on a Material Data Sheet available from Hydrocarb Trinidad, Ltd.
